# About this Guide

This guide provides information about using PCSE Online for Ophthalmic Payment services.

The digital service will enable GOS claims to be submitted electronically. They will be validated in real time which will improve the accuracy of payments and give ophthalmic contractors greater visibility of claims and statements.

This user guide is a support tool and covers the following options available on PCSE Online:

- ✓ Navigating the Ophthalmic Payment screens
- ✓ Making GOS 4 claims
- ✓ Searching for claims
- ✓ Viewing statements

## Overview of PCSE Online for Ophthalmic Payments

PCSE Online is a web-based option for securely submitting, tracking and reconciling GOS claims. Users access the service via the PCSE website with a unique log-in ID and password.

The site has been designed to guide users intuitively through the different screens. From the home screen dashboard, users can select and complete the appropriate GOS form, track the status of their claims and view statements.

The information for the online GOS forms is much the same as is required for the paper forms but the electronic system will automatically validate each field as detail is entered. This means any missing information, errors or incomplete mandatory fields will be flagged up before a form can be submitted, significantly reducing the likelihood of claims being rejected and improving the accuracy of payments.

Another benefit of the online submissions being validated in real time is that they can be submitted closer to the payment date because contractors won't have to allow time for posting and processing. The system also allows you to pre-populate up to the first signatory, allowing more efficiency within the practice.
